1871 Dec. 5th The gauge is in perfect order was a little leaky but repaired with white lead.

1874 The 66.15 includes up to May 15th 4.05 fell during the remainder of the month.

A new Glaisher gauge has been used since Sept^r 1874 but the old gauge was read with it for some months and the readings agreed

1875 Gauge slightly sheltered on N.E.

1870 estimated from Glenquoich and
Knapdale sources

This gauge has been set up to provide an overlap to present gauge which will be eventually flooded.

1953 n.p. check. seems over exposed.
Inc no drainage 31/10/54. Gauge seems but very over-enclosed to winds from S. & W.
Suggested that new site should be found 1/2 mile to W. in more broken ground.
9/15/54. A.D. (see above) g. now moved? (Note on 11/1/55)

1956 n.p. (see above) (inc 7.10.57. Site as good as possible in area but steep slope from N to S. Enclosure vents should be cut by 1 ft.)
1955 Print.
Air & G. R. covered from 4. G. Edin. 18/1/55 21.59. 24.3 45.59.
