This from Richardson census observing & gauge was moved by major to the Hammer House on 2nd Sept. This site is a continuation of the old one from the 1" map it would appear that the h.t. of 550' given previously must have been an error - why? Wall 15' high 30' N, Cottage 25' high 60' E, Sheds 26' high 60' W, farm shed 20' high 320' S

550' was accurate but when station was at first position i.e. before move of 400' to the E in 48.
