* 1873 November given as 4.18 and total as 28.02. By calculation from adjacent stations the rainfall for Nov^r should be 2.32
 Mean $\frac{2.03 + 2.17}{2} = 2.10$

The entry of 2.86 on the 6th is contradicted by every record which can be obtained, and I have no doubt should be 0.86- The total being 4.18

Subtract for error } 2.00
 as above

True total 2.18 agreeing almost exactly with computed total.

* 1874 Sept. 8. W. W. Anson states that 0.86 and 2.18 are the correct amounts

Guisborough ch: 3½ miles N.W. Shelton in Cleveland 3½ N.
